

FOSTERING COMMONFARE

PIE News fosters commonfare or “welfare of commons”: a new and collaborative form of welfare provision based on grassroots democracy and equitable governance of self-managed commons which deals with people’s real needs.

A new and collaborative form of welfare provision

ARE YOU IN?

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 687922

Basic Income Network
ITALIA

THE PIE NEWS PROJECT

The PIE News project aims at improving life conditions for the “new poor”: that 25% and rising of the European population composed of precarious workers, the working poor, people unprotected by safety nets, and young people who are no longer in the education system and experience difficulties in finding a job.

PIE NEWS PLATFORM

The PIE News digital platform will support people who engage in commonfare by:

Informing
about welfare state provision and relevant data

Sharing
good practices with digital storytelling

Supporting
initiatives based on resource-sharing and bottom-up solutions to real needs

THE THREE PILOT STUDIES

The project will be developed through leveraging the work carried out with local people, that is: Museu da Crise working in Amsterdam, Rotterdam and The Hague, in the Netherlands; Basic Income Network Italy working in Milan and Rome; and the Centre for Peace Studies based in Zagreb, Croatia.

PEOPLE PARTICIPATION

PIE News can only be successful with the direct involvement of the people who are the real owners of the platform. Therefore, the project incorporates three pilot studies that will be conducted in Croatia, the Netherlands, and Italy. From day 1, participants will have a direct impact on the design and the chance to adopt and improve the platform.
